

# GO MILTON KEYNES!

## Transport and Travel

### Keeping MK moving

Over the next 10 years Milton Keynes Council will invest about £300 million in transport as part of its plan to keep Milton Keynes Moving – today and tomorrow. The council is committed to sustainable transport options, and to finding innovative ways to improve transport in the city.

Residents were recently asked to vote for their priorities for the council from 2009-2011.

#### **Residents told us their top priority for transport was pot-hole repair.**

Milton Keynes Council repairs dangerous pot-holes within 24 hours of being notified. There are currently five gangs working on repairing the backlog of potholes caused by the severe weather in January and February. This work is expected to be completed in July 2009.
