

MK Underground

The Exhibition

Explore it online at: www.mkartsforhealth.org.uk

MK Underground is an exhibition and programme of activities by **MK Arts for Health** in partnership with **Buckinghamshire County Museum**.

The exhibition brings together Bronze and Iron Age, Roman, Medieval, Victorian and 20th Century objects all found in Milton Keynes. The exhibition is on display at **Milton Keynes Hospital's Cardiology Department** for patients, staff and visitors to enjoy.

The exhibition was created by a team of volunteers working with the museum staff to research and select objects from their collections.

The group made trips to the museum, researched and photographed the objects, designed the exhibition logo and case layout and produced fact sheets in weekly ICT and graphics training sessions over six months.
