

A Source of Inspiration

Recollections is a Heritage Lottery Fund project which has collated and digitised the records of past projects at Inter-Action MK to record the history of the organisation and to provide research, inspiration and creativity for future projects.

Photographs, slides, documents, audio and video are included. And there are many posters, publicity leaflets, exhibition display boards and banners too. Over 17,000 digital files are now stored on computer and linked to information by unique numbers to enable access.

Ten volunteers have worked for a year with a project manager, sorting, scanning, digitising, typing and completing spreadsheets.

The associated video project based on the archive involved 16 young people and an art project produced a commemorative piece in a series of workshops.
